

Q1. Time Complexity - 3.0

 **Stuck somewhere?**
Ask for help from a TA and get it resolved. [Get help from TA.](#)

What is the Time Complexity of the below Code?

- C++
- Java
- Python

```
void solve(){
    int i = 1;
    while(i < n){
        int x = i;
        while(x--){
            // O(1) operation
        }
        i++;
    }
}
```

```
public void solve(){
    int i = 1;
    while(i < n){
        int x = i;
        while(x-- > 0){
            // O(1) operation
        }
        i++;
    }
}
```

```
def solve():
    i = 1
    while i < n:
        x = i
        while x > 0:
            # O(1) operation
            x -= 1
        i += 1
```

Choose the correct answer from below:

- ☐ $O(n \log n)$
- ☐ $O(n)$
- ☐ $O(n \sqrt{n})$
- ☒ $O(n^2)$
- ☐ None of the above
