Q4. Reverse the Array

Solved

Stuck somewhere?

Ask for help from a TA and get it resolved.

Get help from TA.

Problem Description

You are given a constant array **A**.
You are required to return another array which is the reversed form of the input array.

Problem Constraints

1 <= A.size() <= 10000
1 <= A[i] <= 10000

Input Format

First argument is a constant array A.

Output Format

Return an integer array.

Example Input

Input 1:
A = [1,2,3,2,1]
Input 2:
A = [1,1,10]

Example Output

Output 1:
[1,2,3,2,1]
Output 2:
[10,1,1]

Example Explanation

Explanation 1:
Reversed form of input array is same as original array
Explanation 2:
Clearly, Reverse of [1,1,10] is [10,1,1]
