Q3. Max and Min of an Array

</>

Solved

Stuck somewhere?

Ask for help from a TA and get it resolved.

Get help from TA.

Problem Description

Write a program to print maximum and minimum elements of the input array **A** of size **N** where you have to take integer **N** and other **N** elements as input from the user.

Problem Constraints

1 <= N <= 1000

1 <= A <= 1000

Input Format

A single line representing **N** followed by N integers of the array **A**

Output Format

A single line containing two space separated integers representing maximum and minimum elements of the input array.

Example Input

Input 1:
5 1 2 3 4 5

Input 2:
4 10 50 40 80

Example Output

Output 1:
5 1

Output 2:
80 10

Java7 (Open-Jdk-1.7.0)

Need more space?
Try using fullscreen mode

```
1 import java.util.Scanner;
2
3 public class Main {
4
5     public static void main(String[] args) {
6
7         Scanner sc = new Scanner(System.in);
8
9         int min = 2147483647; // ie. 2^31-1
10        int max = -2147483648; // ie. -2^31
11        int length = sc.nextInt();
12        int[] array = new int[length];
13
14        for(int i = 0; i < length; i++)
15        {
16            array[i] = sc.nextInt();
17
18            if(max < array[i])
19            {
20                max = array[i];
21            }
22        }
23    }
24 }
```
