Q2. Add Binary Strings

Solved

Using hints except Complete Solution is Penalty free now

Use Hint

Problem Description

Given two binary strings A and B. Return their sum (also a binary string).

Problem Constraints

1 <= length of A <= 105
1 <= length of B <= 105
A and B are binary strings

Input Format

The two argument A and B are binary strings.

Output Format

Return a binary string denoting the sum of A and B

Example Input

Input 1:
A = "100"
B = "11"

Input 2:
A = "110"
B = "10"

Example Output

Output 1:
"111"

Output 2:
"1000"

Example Explanation

For Input 1:
The sum of 100 and 11 is 111.

For Input 2:
The sum of 110 and 10 is 1000.

Expected Output

Provide sample input and click run to see the correct output for the provided input. Use this to improve your problem understanding and test edge cases

Arg 1: A single String, For e.g 'anagram'
Enter Input Here

Arg 2: A single String, For e.g 'anagram'
Enter Input Here

Run

Java 8 (Array Support)

1 public class Solution
2 {
3 public String addBinary(String A, String B)
4 {
5
6 }
7 }
