Q2. Finding Good Days

Solved

Stuck somewhere?

Ask for help from a TA and get it resolved.

Get help from TA.

Problem Description

Alex has a cat named Boomer. He decides to put his cat to the test for eternity. He starts on day 1 with a stash of food unit, every next day, the stash doubles. If Boomer is well behaved during a particular day, she receives food worth equal to the stash on that day. Boomer receives a net worth of A units of food. What is the number of days he was well behaved?

Problem Constraints

1 <= A <= 2³¹-1

Input Format

First and only argument is an integer A.

Output Format

Return an integer denoting the number of days Boomer was well behaved.

Example Input

Input 1:
A = 5
Input 2:
A = 8

Example Output

Output 1:
2
Output 2:
1

Example Explanation

Explanation 1:
To eat a total of 5 units of food, Boomer behaved normally on Day 1 and on the Day 3.
Explanation 2:
To eat a total of 8 units of food, Boomer behaved normally only on day 4.
