Q1. Help From Sam

Solved

Stuck somewhere?

Ask for help from a TA and get it resolved.

Get help from TA.

Problem Description

Alex and Sam are good friends. Alex is doing a lot of programming these days. He has set a target score of **A** for himself. Initially, Alex's score was zero. Alex can double his score by doing a question, or Alex can seek help from Sam for doing questions that will contribute **1** to Alex's score. Alex wants his score to be precisely **A**. Also, he does not want to take much help from Sam.

Find and return the minimum number of times Alex needs to take help from Sam to achieve a score of **A**.

Problem Constraints

0 <= A <= 10^9

Input Format

The only argument given is an integer A.

Output Format

Return the minimum number of times help taken from Sam.

Example Input

Input 1:
A = 5

Input 2:
A = 3

Example Output

Output 1:
2

Output 2:
2

Example Explanation

Explanation 1:
Initial score : 0
Takes help from Sam, score : 1
Alex solves a question, score : 2
Alex solves a question, score : 4
Takes help from Sam, score: 5

Explanation 2:
Initial score : 0
Takes help from Sam, score : 1
Alex solves a question, score : 2
Takes help from Sam, score : 3

See Expected Output

Java 8 (Array Support)

12 public static int solve(int num)
13 {
14 int count = 0;
15 int i = 0;
16
17 while(i < 32)
18 {
19 if(((num >> i) & 1) == 1)
20 {
21 count++;
22 }
23
24 i++;
25 }
26 return count;
27 }
