Q4

Q1

Q2

Q3

Q4. Unset x bits from right

</>

Solved

 Stuck somewhere?
Ask for help from a TA and get it resolved.

Get help from TA.

Problem Description

Given an integer **A**. Unset **B** bits from the right of **A** in binary.
For eg:-
A = 93, B = 4
A in binary = 1011101
A should become = 1010000 = 80. Therefore return 80.

Problem Constraints

1 <= A <= 10¹⁸
1 <= B <= 60

Input Format

The first argument is a single integer A.
The second argument is a single integer B.

Output Format

Return the number with B unset bits from the right.

Example Input

Input 1:-
A = 25
B = 3
Input 2:-
A = 37
B = 3

Example Output

Output 1:-
24
Output 2:-
32

Example Explanation

Explanation 1:-
A = 11001 to 11000
Explantio 2:-
A = 100101 to 100000

See Expected Output

Java 8 (Array Support)

```
36
37
38
39
40
41
42
43
44
45
46
/*
 * Find the decimal value of the
 * */
for(idx = B + 1; idx < 60; idx++)
{
    ans = (long) (ans + (binaryM
})
return ans;
```

Test Output Code's All Neat!

Compiling your Code...
> Success!

Running Test Cases...
> TestCase - Easy Success
> TestCase - Hard Success
